

**WHAT IS CLAIMED IS:**

1. A panel-type speaker mounting structure comprising:  
an LCD window exposed on the top end of an upper casing frame of a main  
body; and

an LCD module disposed under the LCD window with a gap between the LCD  
module and the LCD window within the main body, and having a plate divided into a  
first portion corresponding to the LCD window and a second portion extended from the  
first portion, for mounting a panel-type speaker.

2. The panel-type speaker mounting structure of claim 1, wherein the  
second portion of the plate is extended in a predetermined direction.

3. The panel-type speaker mounting structure of claim 1, wherein the plate  
is made from a polarizing material.

4. A panel-type speaker mounting structure comprising:  
a first LCD window exposed on the top end of an upper casing frame of a main  
body;

a second LCD window disposed beneath the first LCD window and having a  
first portion corresponding to the first LCD window and a second portion extended from  
the first portion, for mounting a panel-type speaker; and

an LCD module disposed under the second LCD window within the main body.

5. The panel-type speaker mounting structure of claim 4, wherein the  
second portion of the second LCD window is extended in a predetermined direction.

6. The panel-type speaker mounting structure of claim 4, wherein the  
second portion of the second LCD window is formed of one of glass, plastic, or a  
polarizing material.

7. The panel-type speaker mounting structure of claim 4, wherein the first LCD window is in contact with the second LCD window.

5 8. The panel-type speaker mounting structure of claim 4, wherein the second LCD window is spaced from the LCD module.
